

## HYDRAROLL MARK 21 TWIN ROLLER PNEUMATIC ROLLER TRACK PARTS MANUAL

#### LOADING AUTOMATION, INC.

#### **Automated Shipping and Receiving Systems**

# FOR HYDRAROLL PRODUCT SPARE PARTS ORDERS PLEASE CALL, FAX, OR E-MAIL INQUIRY TO PARTS DEPARTMENT:

Tel. 1-800-264-3184 Fax. 1-910-452-3889

E-mail: parts@loading-automation.com

Orders placed before 3:00PM EST will be shipped that day. If calling after business hours, leave message on Ext. 26

Standard business hours are: M-F 8:00AM – 5:00PM EST

# MARK 21 ROLLER TRACK SYSTEM TABLE OF CONTENTS

*DESCRIPTION	*PAGE NUMBER
MARK 21 ROLLER TRACK SYSTEMS	4

# OPERATION & MAINTENANCE ROLLER TRACK SYSTEM

#### AIR INTEGRITY TEST PROCEDURE

Hydraroll Pneumatic Roller Track System. To be completed on all finished units.

#### Test procedure:

- 1. Charge Hydraroll air reservoir(s) by operating truck or tractor engine on an air brake vehicle or by 12V DC compressor controlled by ignition switch.
- Operate engine on air brake vehicle until a pressure of 100 psi is reached or the 12V DC compressor switches off (approximate time is 5 minutes for 12V DC compressor).
   Turn key to off position.
- 3. (Inflate)--Raise all track rollers.
- 4. Check pressure in Hydraroll control box. Pressure must be identical to previous reading. Record reading.
- 5. Re-check system after 12 hour period. Record reading.
- 6. A pressure differential of 10% or less in a 12-hour period is acceptable. If within 10% factor, check block in Hydraroll Performance Certificate and drop all rollers.

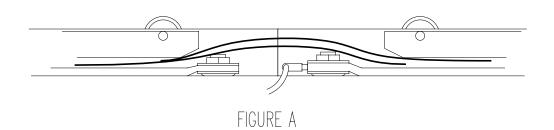

If greater than 10% factor, isolate, fix leak, and re-test unit.

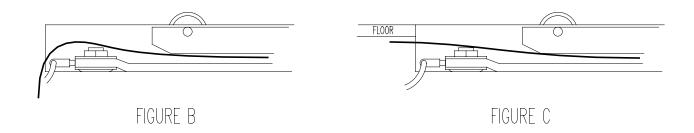

NOTE: The pressure loss must be the <u>equivalent</u> of a 10% loss or less over a 12-hour period.

#### **ACETAL INSTALLATION INSTRUCTIONS**

#### WITH ACETAL IN TRACK FROM FACTORY

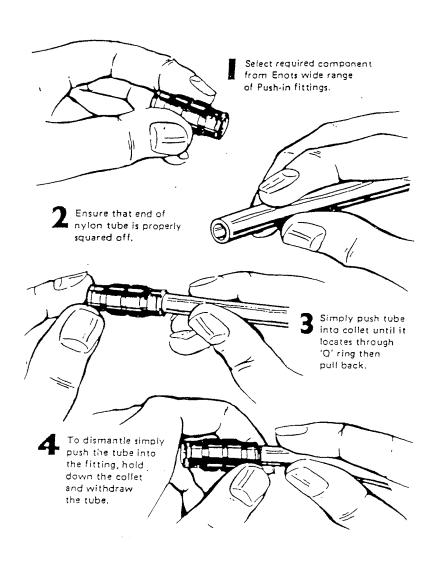

- 1. Install the track modules per installation instructions.
- 2. Overlap the acetal strip from each module (Figure A).
- 3. At the rear of the body, fold the acetal strip down to cover and seal the end of the module (Figure B).
- 4. At the front of the body, allow the acetal strip to extend under the floor (Figure C).

### **TUBING INSTALLATION**

#### METHOD OF ASSEMBLY

#### **DECAL LOCATION DRAWINGS**

- 715005-Forklift Warning Decal
- Locate decal in unobstructed view on inside rear sidewall.

- 715007-Warning Decal
- Locate decal on flat body surface adjacent to control box.

## WARNING

FORK LIFTS PROHIBITED WHILE ROLLERS ARE RAISED. DO NOT WALK ON RAISED ROLLERS.

DRIVE VEHICLE WITH ROLLERS LOWERED WHETHER OR NOT PALLETS ARE LOADED.

OPERATE ROLLER SECTION UP OR DOWN ONLY IF VEHICLE IS PROPERLY PARKED AND POSITIONED FOR LOADING OR UNLOADING. CHECK THAT VEHICLE FLOOR IS CLEAR OF PERSONNEL BEFORE RAISING ROLLERS.

www.hvdraroll.com

#### **DECAL LOCATION DRAWINGS**

- 715032-Airbrake Interlock Decal (optional)
- Locate decal on or near the pneumatic control box.

## **WARNING**

THIS VEHICLE IS EQUIPPED WITH AN AIR BRAKE ROLLER TRACK INTERLOCK VALVE **ROLLER TRACK SYSTEM MUST BE LOWERED BEFORE VEHICLE'S BRAKES CAN BE RELEASED** 

- 715003-Operational Procedure/Maintenance Procedure
- Locate decal on the face of the Air Control Box.

Complete operating and maintenance instructions are provided with this unit. Read and understand fully prior to operation. Failure to maintain this equipment in good repair and operating condition can result in unsafe use and loss of warranty.

Maintenance highlights are listed below - consult manual for full details.

#### OPERATING PROCEDURE 1. Load/Unload

Push button(s) in - air in, rollers raised Pull button(s) out - for each loaded section

2. Transportation Button(s) out - air out, rollers lowered

3. Lower rollers when not in use

Comments or questions on Hydraroll Products, call:
Loading Automation Inc.
3310, Enterprise Drive
Wilmington
NC 28405, USA
Tel: (001) 910 791 2125

MAINTENANCE PROCEDURE

1. Weekly Check
Drain water from air receiver and filter bowl in control
box. Visually check tracks for obstructions which
might prevent movement of the rollers.

Monthly Check
Inspect tracks for damage, loose parts and fittings.
Inspect air equipment for leaks, insecure connections, damage to air lines and components. Repair, replace and secure as required.

3. 6-Monthly Scheduled Service Remove top plates from track and clean out any particles from channel sections.

**CLOSE AND LATCH** WHEN NOT IN USE
