LIGHTENING LOADS

WORKING IN
PARTNERSHIP WITH

lightening the load for Tetra Pak

moving floor system

The Client

Tetra Pak are a world-leading food processing and packaging solutions company. By working with their suppliers, they provide safe and nutritious food in over 160 countries every day.

Tetra Pak were founded in Sweden in 1951. Since then, they have been using the latest science and technology to aid their team of innovators and experts to solve the biggest challenges within the global food and beverage industry.

The Challenge

Tetra Pak required a solution that would help them speed up loading times at the factory plant, resulting in less waiting time and ultimately less trucks and trailers being used. They also required a safe

system that would enable them to carry out their loading operations without putting their employees at risk.

The Solution

The Moving Floor System was installed as this slatted conveyor floor is ideal for unpalletised loads, paper rolls, stillages or drums. With the heavy load, the system is 100% safe as the dock lock system locks the trailer on the docking system. There is higher level of safety because of less forklift movements.

It's particularly used in the Beverage industry for moving barrels, and in the Automotive industry for moving tyres

Conclusion

They need less trucks and trailers because of the faster

loading and unloading time, which means less traffic and shorter waiting times at the factory plant.

There are 3 Moving Floor trailers in the fleet doing the shuttle bringing the paper rolls to the factory.
