WORKING IN
PARTNERSHIP WITH

HEINZ

Heinz use Joloda Hydraroll to
keep our favourites loading

slipchain

The Client

Heinz is an American food processing company that was founded in 1869, in Pennsylvania, USA. Heinz operates on a global scale and aims to make a sustainable, ethical impact while helping to feed the world in a healthy, responsible way.

Heinz's production site in Wigan is one of the biggest food processing plants in Europe, producing over one billion cans of food per year.

The Challenge

increasing demand, diversification and changing lifestyles led to an increase in the product portfolio. The 2 Slipchain docks installed over 12 years ago did not have sufficient capacity to keep up with the increase in demand.

The Solution

Having benefitted from the productivity increases an Automated Loading System offers, Heinz knew there was only one place to go. A further Slipchain loading dock was added at the site to increase capacity. The system can handle up to 30 pallets per load, with the trailers being loaded and unloaded in 2 minutes. 4 Slipchain shuttle trailers travel between production and the national distribution centre, a distance of 1/2 mile.

Conclusion

Pneumatic rise and fall chain and Rollerbed offers high-speed pallet accumulation, and loading and Unloading of full pallet loads. The pallets are automatically transferred from the dock into the trailers fitted

with our Slipchain system.

Many brands including Princes, Nestle, Coors Brewers, Unilever, Proctor & Gamble and Pepsi-Co choose to use this system. It saves them several hours per day versus forklift loading, and provides a safer loading process.
